

**i. Indirect Costs**

|                                 | Budget Period 1 | Budget Period 2 | Budget Period 3 | Total |
|---------------------------------|-----------------|-----------------|-----------------|-------|
| Rate applied:                   | 0.0%            | 0.0%            | 0.0%            |       |
| Total indirect costs requested: |                 |                 |                 | \$0   |

A federally approved indirect rate agreement, or rate proposed supported and agreed upon by DOE for estimating purposes is required if reimbursement of fringe benefits is requested. Please check (X) one of the options below and provide the requested information if it has not already been provided as requested, or has changed. Calculate the indirect rate dollars and enter the total in the Section B., line 6.j. (Indirect Charges) of form SF 424A.

**There is a federally approved indirect rate agreement. A copy is provided with this application and will be provided electronically to the Contracting Officer for this project.**

*\*In the area designated below, identify the full calculations used to derive the total indirect costs. See further information below.*

**There is no current, federally-approved indirect rate agreement.**

*When this option is checked, the entity preparing this form shall submit an indirect cost rate proposal in the format provided at the following website, or in a format that provides the same level of information and which supports the rate(s) being proposed for use in estimating the project. Go to <https://www.eere-pmc.energy.gov/forms.aspx> and select PMC 400.2 Sample Rate Proposal. \*In the area designated below, identify the full calculations used to derive the total indirect costs. See further information below.*

**Additional Explanations/Comments (as necessary)**

**\*IMPORTANT:** In the space provided below (or as an attachment) provide a complete explanation and the full calculations used to derive the total indirect costs. If the total indirect costs are a cumulative amount of more than one calculation or rate application, the explanation and calculations should identify all rates used, along with the base they were applied to (and how the base was derived), and a total for each (along with grand total). The rates and how they are applied should not be averaged to get one indirect cost percentage. **NOTE:** The indirect rate should be applied to both the Federal Share and Recipient Cost Share.
